Regular Meeting, First Tuesday

the National corn exposition which is under instruction to be held in Columbia from January 27th, to February 8th. It is the biggest thing of the kind ever held in the South. Every boy who at any time has been a member of the corn clubs, or who expects to be, should go. Every corn club boy is wanted there on Sat-urday February 1st., to march in the parade. Let each one carry a corn stalk for a walking cane. It is said that all corn club boys will be entitled to attend the grand banquet free of

Ed Richardson, colored, performed a feat yesterday which is seldom seen save in side-shows and at vaudeville performances where jugglers and sleight-of-hand tricks are expected. Richardson was shot with a pistol, while he and another negro were examining it and a second later he calmly spit out the bullet and walked off to have a doctor examine and dress the wound which was inflicted. The ball entered just below the nostril and was stopped against the reof of his mouth. Dr. Birnie, who attended him, stated that he would probably suffer no serious effects from the wound. The shooting was said to have been accidental .-

plus. The following officers were re-elected: S. J. Tomlinson, president; capita wealth of any city in the United R. E. Smith, Sr., vice president; R. E. Smith, Sr., vice president; R. E. Smith, Sr., vice president; R. E. States. Smith, Jr., cashier; directors, R. M. Godwin, R. E. Smith, Sr., Rev. B. K. Truluck, B. M. Truluck, W. D. Truluck, M. E. Truluck, L. R. Truluck, S. J. ALASKA'S "SILENT CITY."

Wonderful Mirage That Is Said to Have Been Photographed.

One of the best stories regarding a mirage is that told in Alaska concerning the appearance of a city in the sky. This "silent city" is said to have actually been photographed, and, though there are skeptics, enough people claim to have seen it to make the story interesting.

The first account of this "city of sifence" was told by a prospector named Willoughby. He was a miner in California and went to Alaska, where he settled in the vicinity of Muir glader. In fact, it was Willoughby who piloted Professor Muir when he ascended the immense ice field which now bears the scientist's name. Willoughby always told the story of this city which appeared in the sky with much earnestness, and he carried a photograph which he said he took after several visits to the spot whence the vision could be seen.

When Willoughby first went to Alaska natives told him that at certain times of the year when the days were longest and the atmospheric conditions right they saw suspended in the heavens a town with streets, houses and many different kinds of buildings. So impressed was he that he engaged the Indians to take him to the place where the city could be seen, and in their canoes traveled to the spot.

After several attempts Willoughby at length saw this "silent city," as the natives called it. He said that the atmosphere was so clear that mountains in Clarendon. Write me what you many miles away seemed near and that as he gazed the outlines of a city gradually assumed shape, and building after building came to view. He distinctly saw tall office buildings, churches and spires, houses and every indication that the city was inhabited; but, though he saw it several times, he could never detect a human being. A halo of light seemed to cover all. As he gazed the vision faded and gradually receded. So convinced was he that he was looking at the mirage of an actual city that he made records to show that he had been on the exact spot whence the picture in

the sky could be seen. Willoughby's photograph was crude, but enough could be discerned to lead persons to assert that it was a view of Bristol, England, many thousand miles away. Willoughby told his story in 1888 or thereabouts. Since then several persons have said that they saw the mirage. In every instance the mirage was surrounded by a halo of light which poured a soft glow on roof and walls - New York Sun.

Escaped After Fifteen Years.

cape after fifteen years of suffering fro kidney and b'adder troubles. Fole Kidney Pills released him and will djust the same for others. He say: They cured a most severe backact with painful bladder irregularities, an they do all you claim for them. Refus substitutes. The Dickson Drug Co. Manning; Leon Fischer, Summerton.

An Incautious Critic. Almost the last work that Sir Edwin Landseer was engaged on was a life sized picture of Nell Gwyn passing through an archway on a white palfrey. This picture, in which the horse alone was finished, was bought by one of the Rothschild family and given to Sir John Millais to complete. One morning a celebrated art critic called and was much impressed with his work. "Ah, to be sure!" he said, going a fire until he returned, Faraday being up close and examining a deerhound. which almost breathed, in the foreground of the picture. "How easily one can recognize Landseer's dogs! Wonderful, isn't it?" "Yes, it is wonderful," remarked Sir John, lighting another pipe. "I finished painting that

Daniel Was a Worker. Truly there were giants in colonial days. One Daniel Leake of Salisbury, N. H., made during his lifetime and was paid for 1,000,000 shingles. During the years he was accomplishing this colossal work he cleared 300 acres of land, tapped for twenty years at least 600 maple trees, making sometimes 4,000 pounds of sugar a year. He could mow six acres a day, giving nine tons of hay. His strong, long arms cut a swath twelve feet wide. In his spare

whole of it myself." That critic was

TENNIS IS ANCIENT.

The Game Had Its Origin In the Old Days of Knighthood

By many people tennis is thought to be an essentially modern game, but in reality it is probably one of the most ancient ball games and was a sport long before cricket was dreamed of. Though undoubtedly not existing during the Arthurian period, tennis, or, as it was called, "tenez," is mentioned in the Arthurian legends, written in 1500, and the knights of the round table were pictured as engaged in the sport when the weather was too hot for tourneys or jousts.

From a simple beginning and through many centuries, the intricacy of the game's rules have been developed, writes a contributor to the London Times. Its present name seems to be a corruption for the term "tenez," which the server used in the same way "ready" is called out now. In the beginning the name was jeu de paume, taken from the fact that the ball was struck with the hands instead of with racket. Later the hand was incased in a glove, and still later the glove was covered with strings running criss cross, from which condition there was but a short step to the short handled

In feudal times the courts were merely open grass plots, oftentimes the lawn of a castle, and not till late in the seventeenth century was the court inclosed, when walls were built as backstops. Now most of the modern English and French courts are entirely inclosed with four walls and a roof.

WENT DOWN WITH HIS SHIP

Tragic End of the Designer of the III Fated Titanic.

The story of a brilliant career terminating in abrupt tragedy has been written by S. F. Bullock in his "Life of Thomas Andrews," the designer of the Titanic. After studying at the Royal Academical institution at Belfast Andrews entered the Harland & Wolff shipyards as apprentice. In 1904, at the age of thirty-one, he was made chief designer. Later he became a managing director. Andrews sailed on the Titanic, cer-

survivor has told how, after the collision, Andrews busied himself with helping women into the boats and directing the rescue work in other ways. This is the story of his last moments: One met him bareheaded and carrying a lifebelt on his way to the bridge, perhaps to bid the captain goodby. Later an assistant steward saw him standing alone in the smoking room, his arms folded over his breast and the elt lying on a table near him. The eward asked him, "Aren't you going to have a try for it, Mr. Andrews? He never answered or moved. "Just

tain, as he wrote to his wife, that the

ship would "do the old fifm credit" A

stood like one stunned." Others saw him a few minutes before the end on the boat deck, our final and grandest sight of him, throwing deck chairs overboard to the unfortunates struggling in the water below.

He Obeyed Orders. Sir Henry Roscoe tells this of the scientist Faraday and his assistant, Sergeant Anderson: "Anderson was the sole assistant to Faraday and of course was utterly uneducated in scientific matters, but he could obey orders, which is not always a characteristic of an educated man. One day Anderson was told by Faraday to keep stirring a pot containing some chemicals over in the habit of going upstairs to tea in his rooms and coming down directly afterward to work in the laboratory during the evening. For some reason he was prevented from coming down again and forgot that he had told Anderson to watch the pot. On coming dog yesterday and have done the down the next morning he found Anderson still stirring the pot, having been at it the whole night and thus carrying out the order which was giv-

en him." His Advice Worked. "And don't forget to climb, boy," said the later day Polonius as he parted from his college bound son; "climb and keep a-climbin'."

"I won't forget, dad," said the boy. "Goodby."

He didn't forget. Three days later he climbed over the prostrate forms of twenty-seven disabled sophomores and, climbing the greased pole to the hated upper class emblem, yanked it from its fastenings, thereby winning a place in the esteem of his fellow students that a score of scholarships couldn't equal.-Cleveland Plain Dealer.

Dead as a Doornail. "As dead as a doornail" at first seems utterly senseless, but becomes lively and picturesque when we remember that knockers were once universally used. Beneath the knocker, in order to prevent disfiguring the door, a large nail or bolt was driven. An impatient caller, waiting for the door to be opened, would frequently use the knocker with great force, and the irresponsiveness of the nail gave

Inconsistency.
"What is inconsistency?" asked the

curious one. "Well," responded the wise one, "It is that spirit which moves a woman whose sleeves stop at the elbow to scold her husband because he hasn't any cuffs on."-Exchange.

Lawyer-You say that you want a divorce from your husband. Why is it that you can't get along with him? Client-He wants me to be reasonable,-New York Press.
